

Tork Xpressnap Snack Extra Soft Serviet med blad-motiv, N10

Farve: Hvid

Fordel

- Ekstra blød, tyk og fyldig serviet til de lejligheder, hvor en lille serviet er tilstrækkelig
- Servietterne er dekorerede med et elegant, hvidt blad-motiv
- Perfekt til fastfood restauranter, som har fokus på omkostninger men også ønsker kvalitet
- Hvert bundt ligger hygiejnisk beskyttet i en plastindpakning
- Godkendt til kontakt med fødevarer. EU Miljømærket
- Tork Easy Handling: Nemt at åbne emballagen og nemt at gøre den flad og bortskaffe den

Miljø

Content

The fibre composition in the product is virgin fibres

Material

Virgin fibre

Virgin pulp fibres are produced out of softwood or hardwood. The process is either sulphite or sulphate delignification, meaning that e.g. lignins and resins are removed from cellulosic material.

Bleaching of fibres

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.

There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view .

The used functional chemicals are:

Dry strength agent

Dye = if coloured

Fixing agents

Fluorescent whitening agent

Glue

Softeners

The process chemicals are:

Antipitch

Protection agent

Yankee coating

Tork Xpressnap Snack Extra Soft Serviet med blad-motiv, N10
