

ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET

Product

Flat Top Pillar candles

Raw Material

Paraffin mixture

Additives

Wick
Colour

Packaging

Inner: Paper banderole
Outer: Corrugated board.

Field Of Application

The candles are intended for indoor use to create an atmosphere.

- Always place the candle on a fireproof and heat resistant ground.
- Do not burn candles near curtains, lace curtains etc.
- Never leave a burning candle unattended.
- Do not move a burning candle.
- Do not extinguish candles by blowing
- Only use holder with sufficient air circulation.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC. For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects

Product:

Paraffin is a by-product from the production of fuels from crude oil. When burning a candle, mainly carbon dioxide and water are formed.

Packaging

The corrugated box is unbleached and to some extent made of recycled paper. Paper is made out of wood, which is a renewable resource. The pulp is a ECF-pulp (Elemental Chlorine Free). The pulp is 100% made of virgin fibers.

Product Safety

- As always when burning it is important with sufficient oxygen supply.
- RAL- Certified
- Duni manufacturing units are certified according to the international quality system ISO 9001 and 9002. They have also implemented or will implement the environmental management system ISO 14001.

Management Of Used Products

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recycling

Recycling of plastic and the corrugated board is possible for producing new products. Check with the local recycling company.

Validity

This is a copy of a document issued 2011-01-12. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB, Environmental Affairs.
